SUMMARY

Entry-level penetration tester with hands-on experience in network security testing, vulnerability assessment, attack simulation, and secure API development. Strong foundation in reconnaissance, exploitation techniques, traffic analysis, and security reporting. Experienced with industry-standard pentesting tools and OWASP-based methodologies.

TECHNICAL SKILLS

- **Offensive Security:** Network Penetration Testing, Vulnerability Assessment, Reconnaissance, Exploitation, Security Reporting
- **Pentesting Tools:** Nmap, Wireshark, Metasploit, Burp Suite, Nessus, OpenVAS, Splunk
- **Programming & Scripting:** Python, C, Bash
- **Networking:** TCP/IP, DNS, VPN, Firewalls, IDS/IPS, 5G Networking Concepts
- **Frameworks & Standards:** OWASP Top 10, NIST
- **Platforms:** Kali Linux, Linux, Git

EXPERIENCE

Cyber Security Research Lab (CSRL), National Institute of Technology Karnataka Jun 2025
Research Intern

- Conducted security research focused on network traffic analysis and attack behavior identification.
- Simulated attack scenarios and analyzed malicious traffic patterns in controlled lab environments.
- Worked with security logs and experimental datasets to study attack indicators and anomalies.
- Assisted in documentation and reporting of security research findings.

Zyphron Technologies Pvt. Ltd., Coimbatore Jun 2024
Pentesting Intern

- Performed network penetration testing and vulnerability assessment on internal systems.
- Conducted reconnaissance and scanning using Nmap and Wireshark.
- Assisted exploitation and validation of vulnerabilities using Metasploit.
- Documented findings with risk rating, impact analysis, and remediation recommendations.

PROJECTS

MAC Address Based Authentication API 2025

- Designed and developed a secure RESTful authentication API using Flask and SQLite.
- Implemented multi-factor style authentication using username, password, and hashed MAC address.
- Addressed common security issues including improper authentication and access control.
- Added CORS support, database retry logic, and secure deployment using Gunicorn.

Virtual Reality Based ATM 2024

- Built a VR-based ATM interface with focus on secure authentication and data protection.
- Applied basic threat modeling concepts during system design.
- Tools: Unity, Meta Connect, C#.

EDUCATION

M.Tech (Integrated) in Computer Science and Engineering 2022 – Present

Sri Ramakrishna Engineering College, Coimbatore

Higher Secondary School (HSC) 2020 – 2022

Bharathi Matriculation Hr. Sec. School, Coimbatore

Secondary School (SSLC) 2008 – 2020

Sindhi Vidhyalaya Matric Hr. Sec. School

CERTIFICATIONS

Certified Cybersecurity Educator Professional (CCEP) (2025)

Cisco Networking Academy – Network Technician (2024)

Infosys Springboard – Python Fundamentals (2024)

NVIDIA – Fundamentals of Deep Learning (2024)

LEADERSHIP & ACHIEVEMENTS

President, OWASP Student Chapter – SREC (2025)

Joint Secretary – Reading Movement @ SREC (2024)

Best Mini Project Award – Dept. of CSE, SREC (2024)

ADDITIONAL

Hobbies: Cooking, Cricket

Languages: English, Tamil, Telugu
